

Green Point Christian College

"We have an ongoing working relationship with LA."

TREVOR MAHER, BUSINESS MANAGER

A significant re-development program was required to meet the demand for private schooling. Expressions of interest for Project Managers were sought and LA were selected to engage and manage specialist sub-consultants on behalf of the client. This involved liaising with local authorities and to design the most cost effective buildings for the College's requirements. Stages included a one thousand seat multi-purpose centre and associated facilities, three classroom blocks with over fifteen GPLAs, staff rooms, administration renovations, a major two level library extension with specialist areas and separate kindergarten facilities. LA also undertook major ground works for developing playing fields and bushfire hazard reduction zones.
