

Bethshan Residential Care Facility

“Excellent standard of workmanship and under budget.”

LINDSAY SLATER, ACCOUNTANT

To meet the high demand for residential care facilities, Bethshan Ministries pursued a development program to add both high and low care beds. Both stages provided 98 beds and the building has a total footprint of over 5000m². Amazingly, this has been designed without the need for any disabled ramps. The building design was a slab-on-ground and standard brick veneer construction with impact wall linings to corridors and other high traffic areas. LA's strong partnering nature and contract administration skills ensured that major cost savings were passed on to the client and despite wet weather, the original program deadline was met.
