

Wyong Christian School

“I often recommend LA to other schools.”

GRANT KAYES, FINANCIAL CONTROLLER

LA were selected as Construction Managers in a Project Control Group developing an extensive new K-12 staged Christian School. LA worked in close consultation with the school's architect throughout and regularly made recommendations during the building design phase, which resulted in substantial cost savings for the client. Stages included seven classroom blocks with over twenty GPLAs, further spaces for science, catering, technics, textiles, music, art, sports and administration facilities. Major road works and associated car parking were also completed.
